

Solacoat AUSTRALIAN TESTIMONIALS

"Several team members have commented to me that the working environment is now cooler. There is no doubting the obvious difference that the product has made. It is unlikely that we will install any other cooling measures to the warehouse now that we have painted the roof with SOLACOAT."

Cate Field - Property Services Officer, Supercheap Auto

"SOLACOAT was applied some 15 years ago to our building. In summer SOLACOAT is still keeping the temperature inside our warehouse down to pleasant working conditions, and the important fact is we never lose any stock in summer. It is a marvelous product and there is no sign of deterioration on the outer walls and roof".

Mark Thompson - District Sales Manager N.T.

"Since the application no rust has occurred. It has saved us many thousands of dollars to replace the roof. When SOLACOAT was applied we noticed the coolness in the top floor immediately, and the air conditioning costs reduced".

Trevor King - Director, Lord Byron Resort

GARLICK'S Heating & Cooling

"The outside temperature had got to 38 degrees - we would be looking at 30 degrees plus inside the office. The office now hasn't been above 23 degrees. The tenant has noted a reduction in the running cost of the air conditioning system".

Lea Burrow - Manager, Garlick's Heating and Cooling

"Any doubts about its efficiency were expelled the day our roof was painted. I could hardly believe a coat of paint would have a dramatic effect on the temperature inside our building. Our cooling is now more efficient".

Bob Male - B & B Discount Lighting

"When it was being coated, the roof temperature was 62 degrees on the uncoated part, with a temperature of 29 degrees on the treated part".

Terry Andrews - Managing Director, Advantage Group S.A.

"Rail painting was undertaken at various locations on the NSW Coast and the main Southern line. In metropolitan Sydney a commuter passenger line 5km stretch was subject to 5 heat buckles in the summer of 2004/5. This reduced to zero the following summer, following rail painting (SOLACOAT)".

Peter Hanrahan - Pacific Edge P/L: Rail Painting for Queensland Rail.

"The result was immediate and has resulted in noticeable lowering of our company's power bill. In the 12 years since the treatment was applied, the product has continued to perform well with no extra applications".

Roger Harris - Managing Director, Alice Springs Commercial Broadcasters P/L

PIONEER
A DUPONT COMPANY

"At our Narrowmine plant, in summer it is not uncommon to experience ambient temperatures of 45 degrees. We have used your product SOLACOAT on the roof and western wall and have found it to be very effective in reducing the temperature. It will definitely help increase the shelf life of our products stored by maintaining a cooler environment".

Scott Magill - Plant Leader
